

#### THRESHOLD SENSITIVITY SUMMARY

---

Recommended Thresholds:

- Similarity: 0.50 (F1: 1.000)
- KDE Bandwidth: 0.10 (OOD AUC: 1.000)
- Risk Threshold: 0.05 (F1: 1.000)

Observations:

- Higher similarity threshold = higher precision, lower recall
- KDE bandwidth has moderate sensitivity
- Risk threshold has clear optimal range around 0.3-0.5
